

Case Elevators and Lowerators

Designed and manufactured to specification.

**Engineered to meet your unique configuration.
Maximize floor space by utilizing multiple levels in a plant.
Designed to save time and labor by positively controlling product.
Easily accessible, extremely efficient.**

Product arrives by conveyor and the motor driven elevator (or lowerator) accepts the cases and raises (or lowers) them to another conveyor system for discharge.

Elevators can be purchased as stand alone equipment or can be fully integrated or “slaved” to a case packing system.
